

Introduction to Data Science Group Project Task 2

K9

2025-12-03

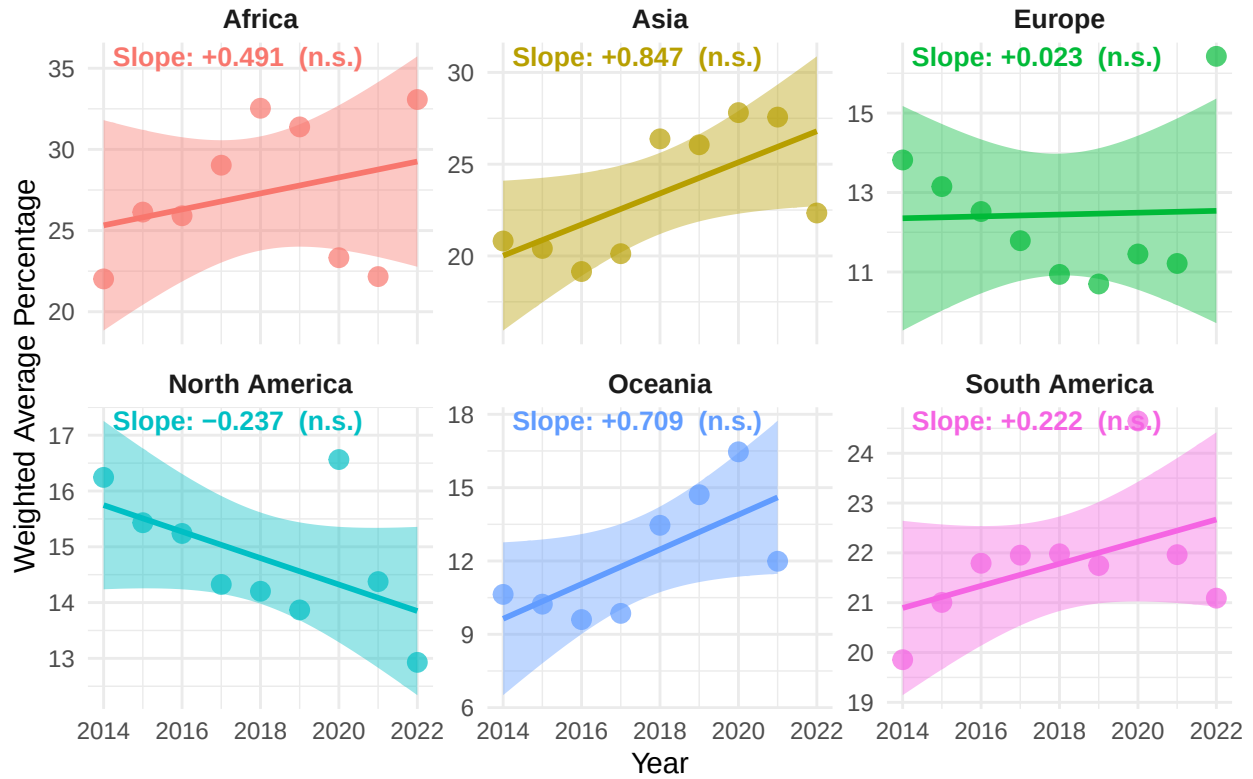

In this section, we will discuss the extent each continent working toward the goal of reducing the proportion of youth not in employment, education or training (hereafter referred to as NEET).

We would first draw a graph to demonstrate the change of NEET for each continent with the year using the line graph.

We then would like to see the regression line for the NEET.

Youth Not in EET: Trend by Continent

Then we would like to see how education and employment each contribute to the NEET, one would create a table to illustrate how they correlated

Table 1: Correlation of NEET with Youth Unemployment and Education Attainment (Continental)

Continent	Corr_EA	P_Value_EA	Corr_Unemp	P_Value_Unemp
Africa	0.4667	0.2125	0.1667	0.6777
Asia	-0.1833	0.6436	0.8333	0.0083
Europe	-0.1833	0.6436	0.4000	0.2912
North America	-0.5000	0.1777	0.9833	0.0000
Oceania	-0.8333	0.0154	0.2619	0.5364
South America	0.5167	0.1618	0.9667	0.0002

If we do not group the data by continent rather seeing them as a whole, then we get the following table

Table 2: Correlation of NEET with Youth Unemployment and Education Attainment (World)

variable	correlation	p_value
EA	0.3013	0
Unemployment	-0.5648	0
